## About Us: Website

### **Kaufman Cabinetry is a one-stop shop for your cabinetry needs.**

Kaufman Cabinetry is a family-owned cabinetry manufacturing business serving small and large contractors and builders. Located in Vaughan, ON, and servicing the Greater Toronto Area, we offer everything from basic hardware to cutting, taping, and Thermofoiling for closets, kitchens, offices, bathrooms, and other custom cabinetry. We are your one-stop shop for all your cabinetry needs.

**Our customers - and their time - are our priority.** We pride ourselves on providing excellent quality products, fast delivery, and exceptional customer service. Unlike other shops, we do all our services in-house, providing our clients with a streamlined, faster process.

**We're not just our clients' manufacturer - we're part of their team.**

### **What We Offer:**

**CNC Cutting and Edgebanding**

**MDF Doors**

**Theromofiling**

## Service Page: CNC Cutting and Edgebanding

---

Made for both small contractors and large builders, our CNC cutting services offers:

- Cuts made with our US-made Thermwood CNC machine and Italian-made Fraval Edgebander, resulting in the highest quality cuts and tape finish
- PO glue for the most adhesive bond and seamless results
- Tests before edge-taping any new material to ensure the best high gloss or super matte finish

All of these are done with high-quality craftsmanship via the latest technology. Our CNC equipment works with MDF, Melamine material, High Gloss, and other AGT finishes.

## Service Page: Thermofoil Services

---

Thermofoil is an affordable, durable cabinetry option that uses heat to pressurize vinyl to an MDF core. Thermofoil is ideal for doors, panels, and surfaces because it's cost-effective, looks sleek and stylish, and is easy to maintain.

We use high-quality PVC film with the industry's latest adhesive glue, ensuring a strong hold that lasts for years. Our Thermofoil products help clients save time and receive a finished product all from one shop.

## Service Page: MDF Doors

---

MDF doors, made from recycled wood fiber, are an ideal choice for your painted cabinetry needs. We use premium-grade MDF for all our MDF doors and components projects. Our specialty is MDF one-piece and two-piece doors.

We provide MDF doors that are affordable, customizable, and built to last. Our clients can choose from two types of doors:

- **MDF cut on CNC, which includes:**

- Shaker
- Double Step Shaker
- Beveled Shaker
- 5-piece faux shaker

We can also create and match for any custom designs.

- **Slab doors**

- Cut from AGT and Melamine panels
- High gloss, super matte, and other finishes are available
- A popular choice for modern kitchens
